The Role of Cybersecurity in the Modern Industry Ecosystem

In collaboration with

ÆRORISK

NURTURING SKILLS & TALENTS BEYOND

YAYASAN PENERAJU

About The Course

This course explores how cybersecurity has become a foundational pillar in today's interconnected industrial landscape. It examines the growing reliance on digital systems, IoT, and cloud infrastructure, highlighting vulnerabilities and the need for robust security frameworks. Participants will learn about threat detection, risk management, regulatory compliance, and best practices across sectors such as manufacturing, energy, healthcare, and finance. The course equips professionals with the knowledge to safeguard assets, ensure operational continuity, and contribute to a resilient industrial ecosystem.

Topics

Module 1 - Introduction to Cybersecurity

Module 2 - Threat Landscape in Modern Industries

Module 3 - Cybersecurity Frameworks

Module 4 - Implementing Cybersecurity Strategies

Module 5 - Cybersecurity in Manufacturing

Module 6 - Cybersecurity in Finance

Module 7 - Cybersecurity in Healthcare

Module 8 - Cybersecurity in Supply Chains

Module 9 - Cybersecurity Governance

Module 10 - Incident Response and Recovery

Module 11 - Cyber Law

Who is this course for :

This course is open to Bumiputera students pursuing their tertiary levels studies in universities, colleges, polytechnics and higher learning institutions

Duration :
1Day - 9am to 5pm
